IDFC FIRST Bank

Taking Banking FIRST into the future

FAME 6.0

Open Innovation Challenge 2026

FIRST Sight

Check the property file before anyone travels

Problem Statement 1 · Digital property valuation for LAP

Live: first-sight-fame.vercel.app

TEAM NAME · Member 1 · Member 2 · Member 3

7 → 2.6 days
to clear a property (est.)

₹5,500 → ₹2,860
per property check (est.)

≈ 20 months
to pay back the ₹8 Cr build

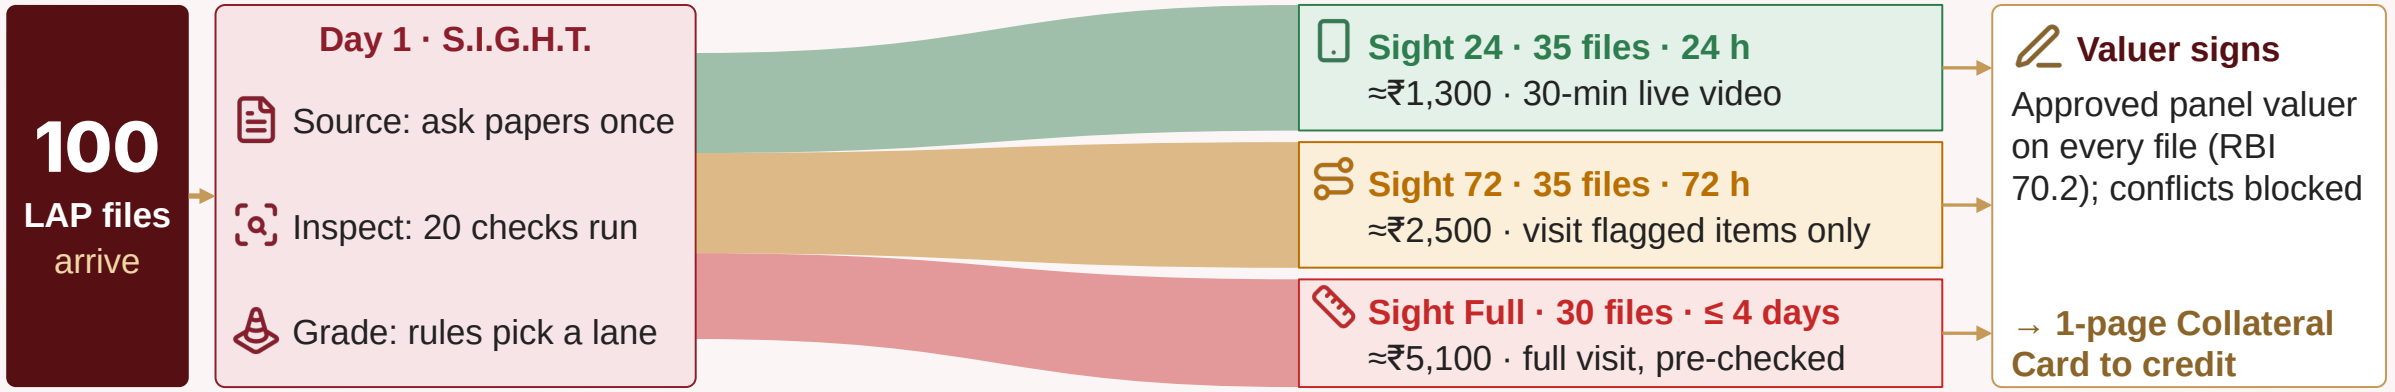

IDFC Report 3 property
with its 30 m video ring

Live prototype
scan to try it

FIRST Sight: LAP Property Checks in 2.6 Days, Not 7

The delay is in paperwork, not visits: we check each file on day one and visit only where risk needs it

HOW 100 LAP FILES FLOW THROUGH FIRST SIGHT

Only 30 of 100 files need a full visit; 70 clear in 72 hours or less, and every file still ends with a valuer's signature

PROVEN IN TESTS

- 69/69 property problems
- 31/31 report errors
- 0 false alarms

100 hidden mistakes of 17 kinds, planted in 64 files the tool had never seen

64 blind files · Nov 2026

WHAT IDFC GAINS (ESTIMATES)

Cost / check	₹5,500	₹2,860
Days to clear	7 days	2.6 days
Credit reads	13 pages	1 page
Full visits	100%	30%

₹9.0 Cr cost saved + ₹7.7 Cr interest

WHY IT IS SAFE

- Panel valuer signs every file
- One switch turns the AI off
- Sight 24: 4+ nearby sales, ±15%
- 1 in 10 fast files fully visited
- Video borrows RBI V-CIP controls

Faster, with no control removed

THE ASK

Scan to try the live prototype

1. 1,000-file shadow pilot
2. Second Sight from day 1

No visit is cut before proof

Sources: IDFC FAME 6.0 case pack; FIRST Sight tests on 10 Nov 2026; RBI CRM Directions 2025, Ch IX. All money figures are estimates.

7 days and ₹5,500 per check → 2.6 days and ₹2,860, with an approved, independent valuer still signing every file

The Delay and the Risk Hide in the Paperwork

IDFC's own 3 reports: the visit takes a day, while papers that disagree surface late and get typed wrong

IDFC REPORT 3: ERRORS THAT REACHED A SIGNED REPORT

1

Total Market Value of Property (A+B) (in Amt)	Rs. 3,39,75,200/-
Fifty Five Lakh Sixty Thousand and Twenty Rupees Only	

Value in words: ₹55.6 lakh for a ₹3.40 Cr house, a ₹2.84 Cr gap

2

Forced Sale Value (85%)	Rs. 2,88,78,920/-

Quick-sale value at 85%; IDFC's other agency uses 80%: ₹17 lakh too high

3

Date of Visit 07.8.2026	tch and inspected on 04.07.2026.

Two visit dates in one signed report: 7 Aug vs 4 Jul

Each error passed the agency's own checks and reached IDFC signed

ALL 3 SAMPLE REPORTS, FIELD BY FIELD

Report →	1 · Dehradun house	2 · Dehradun shop	3 · Coimbatore house
Value	₹3.19 Cr (land only)	₹20.11 Cr	₹3.40 Cr
Size	15% over approved plan	82% over approved plan	No approved plan given
Mismatch	282 sq ft to road widening	Plot 5,192 vs 4,139 sq ft	1 survey no. vs 3 on map
Error	Plan no., govt rate blank	Govt rate left blank	3 errors (shown above)

None of these mismatches needed a site visit to find

WHERE THE DAYS GO: REPORT 1

Site visit — **1 day · 25 May**

Paperwork — **9 days: write, check, sign**

The visit is not the delay; the paperwork is

FIVE INSIGHTS → DESIGN CHOICES

- Time lost after the visit → **pre-fill first**
- Report is mostly desk work → **automate look-ups**
- Risk = papers that disagree → **check each pair**
- Typing creates errors → **generate the words**
- Agencies differ (80% vs 85%) → **one bank rule**

Each choice fixes a cause seen in the reports

SECONDARY RESEARCH

- RBI CRM 2025 paras 70-73: no visit-per-case rule
- LAP = 11% of IDFC's ₹3,46,913 Cr loans (Q2 FY27)
- Mortgages +8.7% YoY vs retail +35.4% (Q2 FY27)
- 99.9% land records online; ULI live in 8 states
- Waiting costs ≈₹7.7 Cr interest a year (est.)

Rules allow it, data exists, and mortgages lag

Sources: IDFC sample reports 1-3; IDFC FIRST Q2 FY27 investor presentation; DoLR DILRMP (Aug 2026); RBI Trend and Progress Report (Dec 2025).

1 day of visit + 9 days of paperwork → fix the paperwork, and both the delay and the risk fall

Lenders Abroad Already Visit Only When Needed

The USA, Australia and UK check first and visit by risk; in India no one decides, so IDFC can be first

WHAT LENDERS ABROAD ALREADY DO, AND WHAT WE TOOK

US 16-17%

USA · Fannie Mae, Freddie Mac

of agency mortgages skipped the full appraisal (mid-2025)

Took: Sight 24 and Sight 72

AU 12% → 21%

Australia · Cotality, big banks

share of desktop and kerbside valuations

Took: evidence-strength grade

UK 3 steps

UK · Hometrack and lenders

automated value, desktop check, visit only if needed

Took: 3 lanes set on day 1

IN 1 ID

India · Valocity, AdvaRisk

per property across lenders; instant ownership check

Took: rule R20, owner history

Every piece already works somewhere; FIRST Sight is the first to put them in one day-1 flow for an Indian bank

WHAT EXISTS IN INDIA VS FIRST SIGHT

	Valocity valuer app	AdvaRisk data APIs	VideoCX video KYC	FIRST Sight
Reads and cross-checks every paper	●	●	✗	✓
Decides how much visit a file needs	✗	✗	✗	✓
Live video check with random prompts	✗	✗	●	✓
Blocks a conflicted or unapproved valuer	✗	✗	✗	✓
Finds the same property across loans	✓	●	✗	✓
Pre-fills IDFC's own report form	●	✗	✗	✓
Checks every agency's report	✗	✗	✗	✓
Watches the property after the loan	✗	✓	✗	✓

We plug their best ideas in (property ID, ownership check) rather than fight them

WHY THE GAP EXISTS

Agencies are paid per visit
their tools speed visits up but never remove one

Data firms sell facts
the visit level is credit policy only a bank sets

Land data is newly usable
records online and on ULI enable a desk check

First-mover path
day 1 Second Sight → month 9 Board-set lanes

The decision is policy; only IDFC can own it

Sources: Fannie Mae value acceptance; Cotality (CoreLogic) Australia; Hometrack UK; Valocity, AdvaRisk, VideoCX, Biz2X websites (Nov 2026).

Abroad, check-first is normal; in India no one decides the visit level → IDFC can be first and own the rules

How FIRST Sight Picks the Visit: 20 Checks, 2 Questions

AI reads, written rules pick the lane, a panel valuer signs: the same file always gets the same answer

HOW THE LANE IS PICKED

Q1 · Serious flag? Loan > ₹5 Cr? Value ≥ ₹50 Cr? Special building? Papers < 70%?

yes → **Sight Full · ≤ 4 days · ≈₹5,100**
Full visit, papers checked first; 2 reports at ₹50 Cr+ (RBI 70.3)

no

Q2 · Smaller flag? Loan ₹1-5 Cr? Papers < 90%? LTV > 50%? Sales evidence not strong?

yes → **Sight 72 · ≤ 72 h · ≈₹2,500**
Engineer visits flagged items only; panel valuer signs

no

No to both questions: a clean, well-evidenced file → **Sight 24 · ≤ 24 h · ≈₹1,300**
30-min live video; 4+ nearby sales within 15%; panel valuer signs

Missing data never speeds a file up · 1 in 10 fast files fully visited

THE 20 PROPERTY CHECKS (RED = SERIOUS)

Area, building	Title, papers	Value	Risk, life
R01 Plot area	R02 Survey no.	R12 Near sales	R10 New sale
R03 Pin offset	R05 No plan	R16 LTV limit	R13 Flooding
R04 Over plan	R06 No layout	R17 Big jump	R14 Expiring
R07 Widening	R08 CERSAI	R18 Govt rate	R15 Life left
R11 Floors	R09 Owner	R19 2 reports	
	R20 2nd loan		

New: R19 (RBI para 70.3), R20 (fraud)

ARCHITECTURE: HOSTED IN MUMBAI

Customer app — papers once on WhatsApp; live photos

→ **Consent** — consent first; Aadhaar, PAN, phone masked

→ **AI reader** — reads papers; never decides a lane

→ **Data feeds** — ULI land records, CERSAI, GIS maps

→ **Rules engine** — 20 written checks pick the lane

→ **Valuer app** — pre-filled form; panel valuer signs

→ **Credit + LOS** — 1-page Collateral Card with sources

Consent before AI · Aadhaar, PAN, phone masked · data in Mumbai · AI off switch keeps rules, video and sign-off running

Day 1: 20 checks → 2 questions → 1 lane, with masked data, an AI off switch and a panel valuer on every file

Report 3 Replayed: Every Problem Found on Day One

In our live app, Report 3's problems show on day one, typed errors are blocked and a fraud file is stopped

How to read: the top 3 panels follow IDFC's real Report 3 (₹3.40 Cr) through steps I, G and H; the bottom row shows the 2 features no rival has, plus a fraud test

Try it live

I · INSPECT: DEED VS LAND MAP

Deed lists 1 survey number (173A/1F); the land map puts the house over 3 → rule R02, serious

IDFC's valuer caught it only at the end

G · GRADE: LANE AND SCORE

Sight Full — This case

Full site visit, papers already checked · up to 4 days

An approved valuer visits, carrying every paper already checked and a pre-filled report

Who signs: An approved valuer (two valuers above ₹50 crore)
Cost (estimate): ≈ ₹5,100 per case

Score 55 = 100 − 22 serious − 14 smaller − 8 papers − 1 price

Rectification deed asked for on day 1

H · SAME FIELDS, BEFORE AND AFTER

IDFC report today

Total Market Value of Property (A+B) (in Amt)	Rs. 3,39,75,200/-
Fifty Five Lakh Sixty Thousand and Twenty Rupees Only	
Forced Sale Value (85%)	Rs. 2,88,78,920/-

FIRST Sight writes it

Property value **₹3,39,75,200**

Rupees Three Crore Thirty Nine Lakh Seventy Five Thousand Two Hundred Only

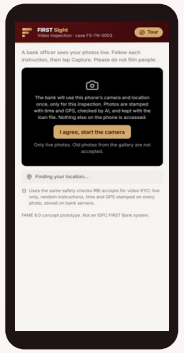

IDFC's real report wrote this value in words as "Fifty Five Lakh Sixty Thousand and Twenty Rupees Only". FIRST Sight writes the words from the number, so this mistake cannot happen.

Forced sale value (quick-sale price), at the bank's 80% ₹2,71,80,160

The real report used 85%, which overstates it by ₹17 L.

Words from the figure; 80% rule: ₹17 lakh fixed

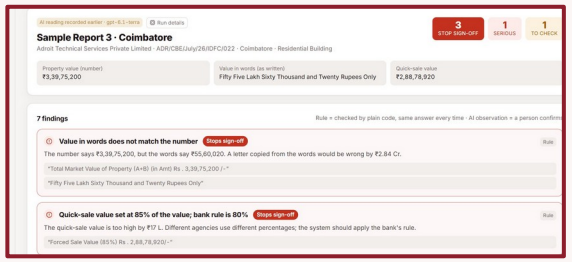

V-PIP: VIDEO FROM OWNER'S PHONE

- Officer's QR opens the video
- Live photos only; fakes flagged
- GPS and time on every photo
- Meter read by AI in 5.6 s

Borrows RBI V-CIP controls

SECOND SIGHT: AGENCY REPORTS

Report 3: 3 sign-off stops, 1 serious; needs no bank system, so it can start day 1

SYNTHETIC FRAUD FILE (CASE 6)

- Owner name differs on the electricity bill
- Another lender's live loan (CERSAI)
- Sold 41 days ago at 37% above nearby
- Same house applied for at Kanpur (R20)
- Seller's valuer blocked at sign-off

Result: Sight Score 7 → Sight Full, stopped before anyone travels

Problems found weeks after the visit → found on day 0, with typing errors blocked and a fraud file stopped at sign-off

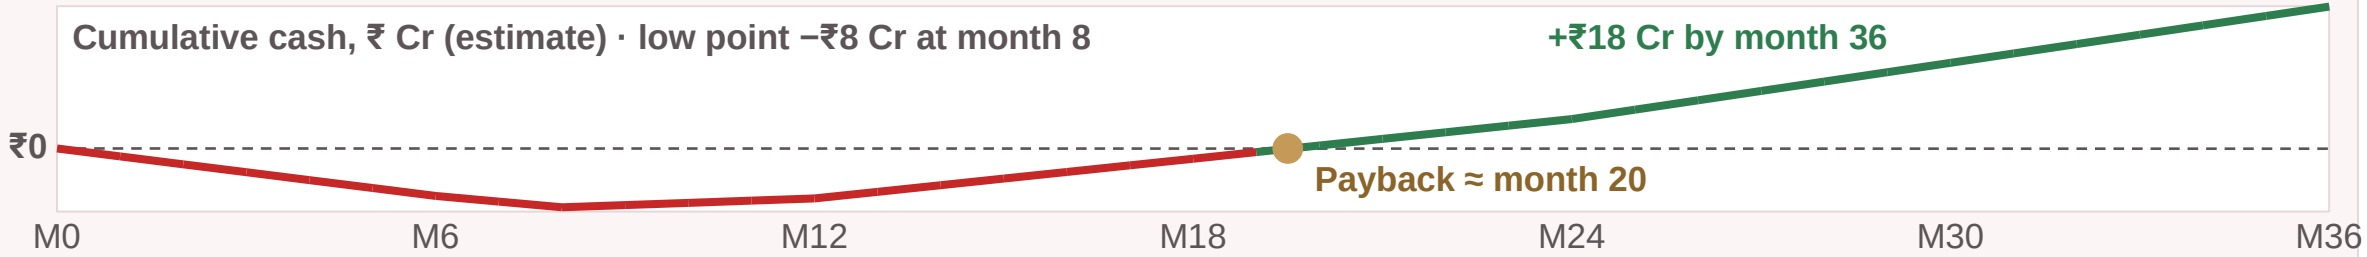

A Shadow Pilot Proves Safety, Then It Pays Back

1,000 files run side by side, lanes go live only after each gate, and the ₹8 Cr build pays back by month 20

ROLLOUT, GATES AND CUMULATIVE CASH

0 Discover M0-2 → **1 Build** M3-5 → **2 Shadow pilot** M6-8 → **3 Live pilot** M9-12 → **4 Scale** M13-24

- Gate: Board approves lanes, shadow only
- Gate: security audit, AI check passed
- Gate: 60%+ auto-filled, 0 misses, AI ≥ 98%
- Gate: errors, defaults no worse than today
- Gate: quarterly risk-committee review

PEOPLE STAY IN CHARGE

Role	What changes for them	Still decides
Customer	asked once; consents once; can ask for a person	video timing
Valuer	must be on the approved panel and declare independence	the value; signs
Credit officer	reads a 1-page Collateral Card with sources	credit decision
Valuation agency	per-lane fee plus speed bonus; keeps complex work	cases it takes

KPIs: 60%+ fields accepted · < 20% overrides · sign-off < 1 day

BUILD COST (EST.)

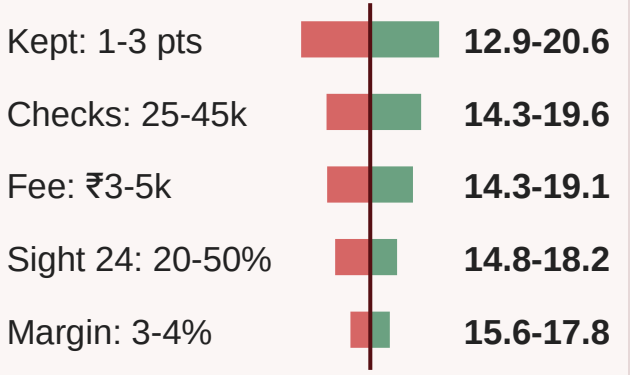

- Product and tech team: ₹4.5 Cr
- ULI, CERSAI, LOS links: ₹1.5 Cr
- AI, cloud, security: ₹1.0 Cr
- Training, change: ₹1.0 Cr

Run: ₹2.5 Cr a year

Not counted: fraud avoided, home-loan reuse, post-loan alerts

GAIN, ₹ CR, IF 1 INPUT MOVES

Base ₹16.7 Cr a year

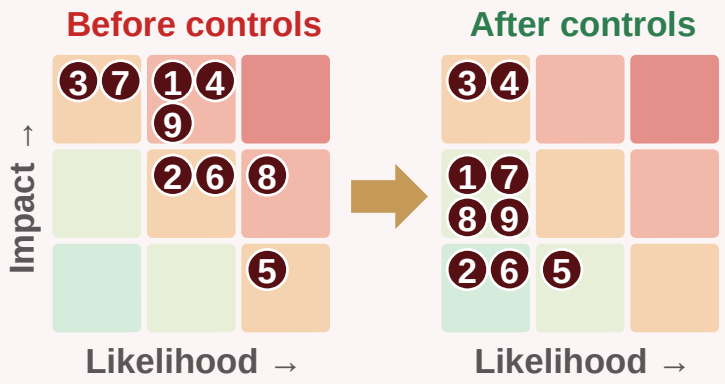

Sources: Team model: 34,200 checks a year; ₹4,000 fee + ₹1,500 staff time today; mix 35/35/30; 2-pt drop-off; 3.5% margin. All estimates.

₹8 Cr build → ₹16.7 Cr a year at full scale, and nothing changes for customers or credit until the pilot proves it

Every Risk Has an Owner; Every Rule Has a Control

9 risks drop after controls, every RBI and privacy rule maps to a control, and we name our offshore-AI gap

RISK HEAT MAP: BEFORE → AFTER

No risk stays in a red zone after controls

RISK REGISTER (RISK 8 IS OUR ONE OPEN GAP)

Risk	Level	How we control it	Owner
1 Wrong house shown	High	Geofence, random prompts, meter	Tech services
2 AI misreads a deed or plan	Med	Exact-words proof; unsure → a person	Model risk team
3 A fast-lane loan goes bad	Med	LTV ≤ 50%; 1 in 10 fully visited	Chief Risk Officer
4 Regulator questions lanes	Med	Panel valuer signs; Board lane policy	Compliance
5 Land data missing	Low	Gaps send the file to a slower lane	Operations
6 Agencies push back	Med	Per-lane fee plus speed bonus	Head of Mortgages
7 Customer data misused	Med	Aadhaar, PAN, phone masked before AI	Privacy (DPO)
8 **AI provider is offshore**	High	Masked text now; India host by pilot	CTO + DPO
9 Valuer collusion, conflict	High	Panel check; seller's valuer blocked	Credit Policy

REGULATORY FIT: RULE BY RULE

Rule	What FIRST Sight does	Status
RBI CRM 2025 · para 70.2	Only approved, independent panel valuers sign	Built
RBI CRM 2025 · para 70.3	2 reports at ₹50 Cr+, lower value used (R19)	Built
Ch X + SARFAESI s.23	CERSAI search day 1; filed within 30 days	Built, sim.
Digital Lending Dir. 2025	Consent first; numbers masked; data in Mumbai	Built
Digital Lending · offshore	India-hosted model or 24-hour deletion	At pilot
DPDP Act + Rules 2025	Notice, purpose-bound consent, person review	Built
RBI FREE-AI 2025	Rules decide; AI off switch; blind test	Built

GOVERNANCE

- **Sponsor: Head of Mortgages** business case and adoption
- **Steering: CRO, CTO, Compliance, Ops** approves every gate
- **Owners: Credit Policy, Model Risk, Tech** plus Audit for 1-in-10 full visits
- **Stop rule:** the fast lane pauses if defaults or value gaps beat the control group

Sources: RBI CRM Directions 2025 (RBI/DOR/2025-26/157) Ch IX-X; SARFAESI s.23; Digital Lending Directions 2025; DPDP Rules 2025; FREE-AI 2025.

9 risks before controls → all lower after, with one sponsor, named owners and a fast lane that pauses itself
