IDFC FIRST Bank

Taking Banking FIRST into the future

FAME 6.0

Open Innovation Challenge 2026

FIRST Sight

Check the property file before anyone travels

Problem Statement 1 · Digital property valuation for LAP

Live: first-sight-fame.vercel.app

TEAM NAME · Member 1 · Member 2 · Member 3

7 → 2.6 days
to clear a property (est.)

₹5,500 → ₹2,860
per property check (est.)

≈ 20 months
to pay back the ₹8 Cr build

IDFC Report 3 property
with its 30 m video ring

Live prototype
scan to try it

EXECUTIVE SUMMARY: LAP CHECKS IN 2.6 DAYS, NOT 7

Objective: check every LAP file on day one, visit only where risk needs it, and cut cost per check by 48%

THE PROBLEM

5-7 days | ≈₹5,500

per check · Report 1 took 9 days to sign

THE SOLUTION

Check papers first

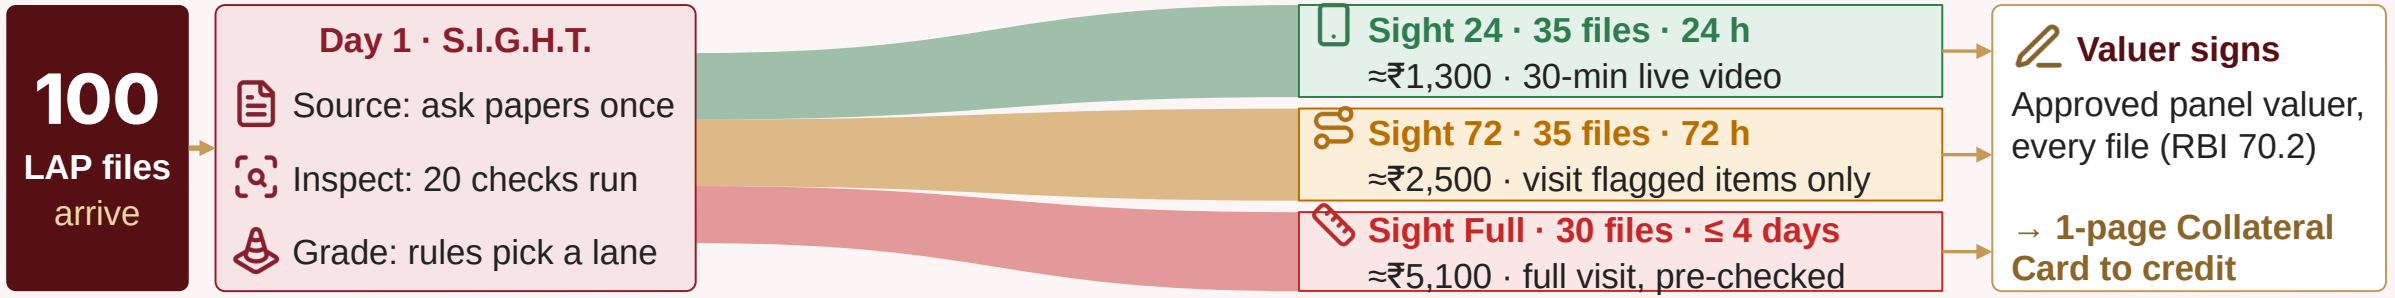

AI reads | rules decide | panel valuer signs

THE OUTCOME

2.6 days | ₹2,860

per check (est.) · payback ≈ 20 months

100 LAP FILES - ONE DAY-1 CHECK, THREE LANES, ONE SIGNATURE

Only 30 of 100 files need a full visit; 70 clear in 72 hours or less, and every file still ends with a valuer's signature

PROVEN - 100 OF 100

69/69	31/31	0
property problems	report errors	false alarms

64 blind files · Nov 2026

WHAT IDFC GAINS - ₹16.7 CR A YEAR

Cost / check	₹5,500	₹2,860
Days to clear	7 days	2.6 days
Credit reads	13 pages	1 page

₹9.0 Cr cost saved + ₹7.7 Cr interest

WHY A CRO CAN SAY YES

- Panel valuer signs every file
- One switch turns the AI off
- Sight 24: 4+ nearby sales, ±15%
- 1 in 10 fast files fully visited
- Video borrows RBI V-CIP controls

Faster, with no control removed

THE ASK

Scan to try the live prototype

1. 1,000-file shadow pilot
2. Second Sight from day 1

No visit is cut before proof

Sources: IDFC FAME 6.0 case pack; FIRST Sight tests on 10 Nov 2026; RBI CRM Directions 2025, Ch IX. All money figures are estimates.

7 days and ₹5,500 per check → 2.6 days and ₹2,860, with an approved, independent valuer still signing every file

THE PROBLEM: DAYS AND RISK HIDE IN THE PAPERWORK

Objective: prove from IDFC's own reports that the visit takes 1 day and the delay and risk sit in papers

THE DELAY	THE RISK	THE COST OF WAITING
1 day vs 9	**3 of 3 reports**	**≈₹7.7 Cr a year**
Report 1: visited 25 May, signed 4 Jun 2026	hid a mismatch, found only at the end	interest lost if 2 in 100 customers leave

IDFC'S OWN REPORT 3 - THREE ERRORS IN ONE SIGNED REPORT

1. | Total Market Value of Property (A+B) (in Amt) | Rs. 3,39,75,200/- |
   | --- | --- |
   | Fifty Five Lakh Sixty Thousand and Twenty Rupees Only | |

   Value in words: ₹55.6 lakh for a ₹3.40 Cr house, a ₹2.84 Cr gap

2. | Forced Sale Value (85%) | Rs. 2,88,78,920/- |
   | --- | --- |

   Quick-sale value at 85%; IDFC's other agency uses 80%: ₹17 lakh too high

3. | Date of Visit: 07.8.2026 | tch and inspected on 04.07.2026 |
   | --- | --- |

   Two visit dates in one signed report: 7 Aug vs 4 Jul

Each error passed the agency's own checks and reached IDFC signed

3 OF 3 REPORTS - EVERY ONE HID A MISMATCH

Report →	1 · Dehradun house	2 · Dehradun shop	3 · Coimbatore house
Value	₹3.19 Cr (land only)	₹20.11 Cr	₹3.40 Cr
Size	15% over approved plan	82% over approved plan	No approved plan given
Mismatch	282 sq ft to road widening	Plot 5,192 vs 4,139 sq ft	1 survey no. vs 3 on map
Error	Plan no., govt rate blank	Govt rate left blank	3 errors (shown above)

None of these mismatches needed a site visit to find

1 DAY OF VISIT, 9 OF PAPERWORK - REPORT 1

Site visit — **1 day · 25 May**

Paperwork — **9 days: write, check, sign**

The visit is not the delay; the paperwork is

4 INSIGHTS - EACH ONE SHAPES THE DESIGN

- Time lost after the visit → **pre-fill first**
- Risk = papers that disagree → **check each pair**
- Typing creates errors → **generate the words**
- Agencies differ (80% vs 85%) → **one bank rule**

Each choice fixes a cause seen in the reports

SECONDARY RESEARCH - WHY NOW

- RBI CRM 2025 paras 70-73: no visit-per-case rule
- LAP = 11% of IDFC's ₹3,46,913 Cr loans (Q2 FY27)
- Mortgages +8.7% YoY vs retail +35.4% (Q2 FY27)
- 99.9% land records online; ULI live in 8 states

Rules allow it, data exists, and mortgages lag

Sources: IDFC sample reports 1-3; IDFC FIRST Q2 FY27 investor presentation; DoLR DILRMP (Aug 2026); RBI Trend and Progress Report (Dec 2025).

1 day of visit + 9 days of paperwork → fix the paperwork, and both the delay and the risk fall

THE GAP: NO ONE DECIDES HOW MUCH VISIT IS NEEDED

Objective: borrow what lenders abroad prove safe, plug in India's best tools, and own the visit decision

4 MARKETS, 1 LESSON - CHECK FIRST, VISIT ONLY WHEN NEEDED

US 16-17%

USA · Fannie Mae, Freddie Mac

of agency mortgages skipped the full appraisal (mid-2025)

Took: Sight 24 and Sight 72

AU 12% → 21%

Australia · Cotality, big banks

share of desktop and kerbside valuations

Took: evidence-strength grade

UK 3 steps

UK · Hometrack and lenders

automated value, desktop check, visit only if needed

Took: 3 lanes set on day 1

IN 1 ID

India · Valocity, AdvaRisk

per property across lenders; instant ownership check

Took: rule R20, owner history

Every piece already works somewhere; FIRST Sight is the first to put them in one day-1 flow for an Indian bank

8 ABILITIES - ONLY FIRST SIGHT HAS ALL 8

	Valocity valuer app	AdvaRisk data APIs	VideoCX video KYC	**FIRST Sight**
Reads and cross-checks every paper	●	●	✗	✓
Decides how much visit a file needs	✗	✗	✗	✓
Live video check with random prompts	✗	✗	●	✓
Blocks a conflicted or unapproved valuer	✗	✗	✗	✓
Finds the same property across loans	✓	●	✗	✓
Pre-fills IDFC's own report form	●	✗	✗	✓
Checks every agency's report	✗	✗	✗	✓
Watches the property after the loan	✗	✓	✗	✓

We plug their best ideas in (property ID, ownership check) rather than fight them

WHY THE GAP EXISTS - AND WHY IDFC

Agencies are paid per visit
their tools speed visits up but never remove one

Data firms sell facts
the visit level is credit policy only a bank sets

Land data is newly usable
records online and on ULI enable a desk check

First-mover path
day 1 Second Sight → month 9 Board-set lanes

The decision is policy; only IDFC can own it

Sources: Fannie Mae value acceptance; Cotality (CoreLogic) Australia; Hometrack UK; Valocity, AdvaRisk, VideoCX, Biz2X websites (Nov 2026).

Abroad, check-first is normal; in India no one decides the visit level → IDFC can be first and own the rules

HOW IT WORKS: 20 CHECKS, 2 QUESTIONS, 1 LANE

Objective: check each file 20 ways on day one, pick its lane by 2 written questions, keep people in charge

CHECKS	LANE	AI DECISIONS
20 checks	**2 questions**	**0**
each names the 2 papers that disagree	same file, same answer, every time	AI only reads; code decides; valuer signs

2 QUESTIONS - HOW EVERY FILE GETS ITS LANE

Q1 · Serious flag? Loan > ₹5 Cr? Value ≥ ₹50 Cr? Special building? Papers < 70%?

- **yes** → **Sight Full · ≤ 4 days · ≈₹5,100** — Full visit, papers checked first
- **no** → Q2 · Smaller flag? Loan ₹1-5 Cr? Papers < 90%? LTV > 50%? Sales evidence not strong?
  - **yes** → **Sight 72 · ≤ 72 h · ≈₹2,500** — Engineer visits flagged items only
  - **no** → **No to both questions: a clean, well-evidenced file** → **Sight 24 · ≤ 24 h · ≈₹1,300** — 30-min video; 4+ sales within 15%

Missing data never speeds a file up · 1 in 10 fast files fully visited

20 CHECKS IN 4 FAMILIES - RED = SERIOUS

Area, building	Title, papers	Value	Risk, life
R01 Plot area	R02 Survey no.	R12 Near sales	R10 New sale
R03 Pin offset	R05 No plan	R16 LTV limit	R13 Flooding
R04 Over plan	R06 No layout	R17 Big jump	R14 Expiring
R07 Widening	R08 CERSAI	R18 Govt rate	R15 Life left
R11 Floors	R09 Owner	R19 2 reports	
	R20 2nd loan		

New: R19 (RBI para 70.3), R20 (fraud)

ARCHITECTURE - BUILT TO RUN INSIDE IDFC, HOSTED IN MUMBAI

Customer app (papers + photos) → **Consent** (masks ID numbers) → **AI reader** (reads, not decides) → **Data feeds** (ULI, CERSAI, GIS) → **Rules engine** (20 checks, lanes) → **Valuer app** (panel valuer signs) → **Credit + LOS** (1-page card)

Consent before AI · Aadhaar, PAN, phone masked · data in Mumbai · AI off switch keeps rules, video and sign-off running

Day 1: 20 checks → 2 questions → 1 lane, with masked data, an AI off switch and a panel valuer on every file

PROOF: IDFC'S REPORT 3 REPLAYED IN OUR PROTOTYPE

Objective: show Report 3's problems found on day one, its typed errors blocked, and a fraud file stopped

FOUND	BLOCKED	CAUGHT
Day 0	**2 errors**	**100/100 mistakes**
deed vs map mismatch, before any visit	value in words, 85% quick-sale value	64 blind files, 17 kinds · 0 false alarms

Try it live

I · DEED VS MAP - FOUND ON DAY 0

Deed lists 1 survey number (173A/1F); the land map puts the house over 3 → rule R02, serious

IDFC's valuer caught it only at the end

G · SIGHT FULL - SCORE 55

Score 55 = 100 − 22 serious − 14 smaller − 8 papers − 1 price

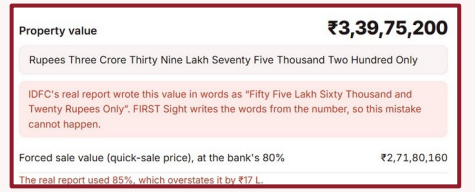

Rectification deed asked for on day 1

H · TYPED ERRORS BLOCKED AT SIGN-OFF

IDFC report today

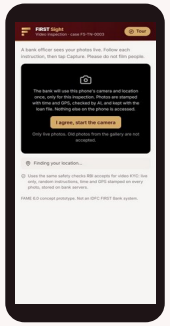

Total Market Value of Property (A+B) (in Amt)	Rs. 3,39,75,200/-
Fifty Five Lakh Sixty Thousand and Twenty Rupees Only	
Forced Sale Value (85%)	Rs. 2,88,78,920/-

FIRST Sight writes it

Words from the figure; 80% rule: ₹17 lakh fixed

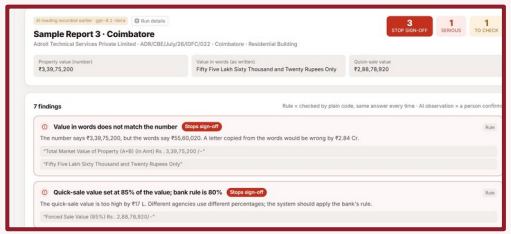

V-PIP - THE PHONE IS THE SITE VISIT

- Officer's QR opens the video
- Live photos only; fakes flagged
- GPS and time on every photo
- Meter read by AI in 5.6 s

Borrows RBI V-CIP controls

SECOND SIGHT - FOR ANY AGENCY

Report 3: 3 sign-off stops, 1 serious; needs no bank system, so it can start day 1

FRAUD TEST - STOPPED BEFORE ANY VISIT

- Owner name differs on the electricity bill
- Another lender's live loan (CERSAI)
- Sold 41 days ago at 37% above nearby
- Same house applied for at Kanpur (R20)
- Seller's valuer blocked at sign-off

Result: Sight Score 7 → Sight Full, stopped before anyone travels

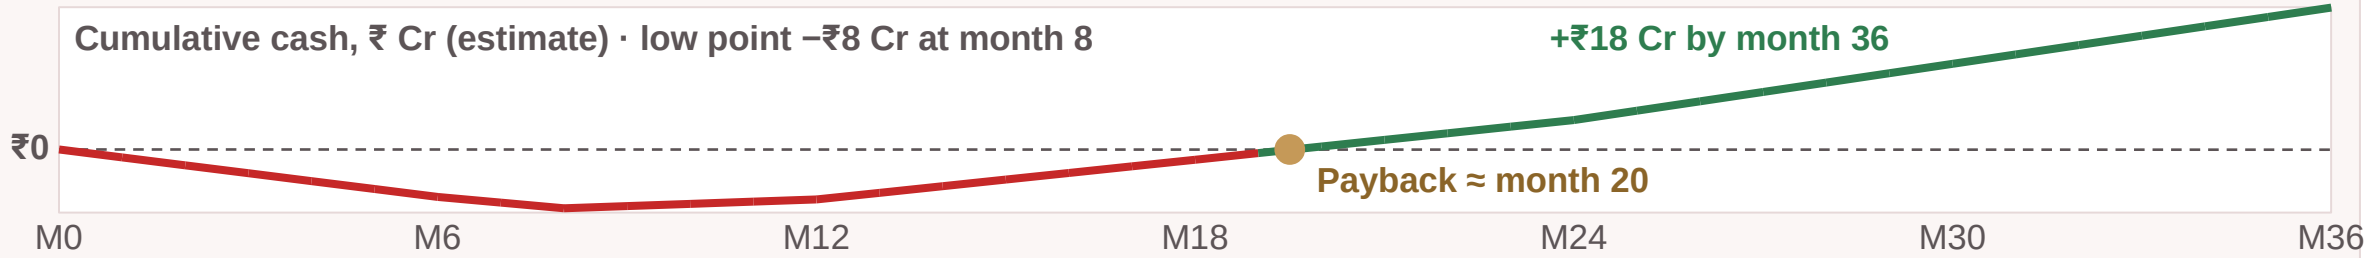

Problems found weeks after the visit → found on day 0, with typing errors blocked and a fraud file stopped at sign-off

ROLLOUT: SHADOW PILOT FIRST, PAYBACK BY MONTH 20

Objective: prove safety on 1,000 IDFC files before any visit is cut, and repay the ₹8 Cr build by month 20

5 PHASES, 4 GATES - CASH TURNS POSITIVE AT MONTH 20

0 Discover M0-2	1 Build M3-5	2 Shadow pilot M6-8	3 Live pilot M9-12	4 Scale M13-24
Gate: Board approves lanes, shadow only	Gate: security audit, AI check passed	Gate: 60%+ auto-filled, 0 misses, AI ≥ 98%	Gate: errors, defaults no worse than today	Gate: quarterly risk-committee review

4 ROLES - EACH GAINS TIME, NONE LOSES A DECISION

Role	What changes for them	Still decides
Customer	asked once; consents once; can ask for a person	video timing
Valuer	must be on the approved panel and declare independence	the value; signs
Credit officer	reads a 1-page Collateral Card with sources	credit decision
Valuation agency	per-lane fee plus speed bonus; keeps complex work	cases it takes

KPIs: 60%+ fields accepted · < 20% overrides · sign-off < 1 day

₹8 CR BUILD - WHERE IT GOES

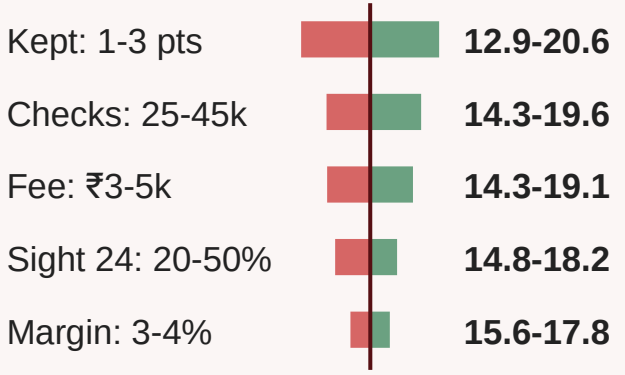

- Product and tech team: ₹4.5 Cr
- ULI, CERSAI, LOS links: ₹1.5 Cr
- AI, cloud, security: ₹1.0 Cr
- Training, change: ₹1.0 Cr

Run: ₹2.5 Cr a year

Not counted: fraud avoided, home-loan reuse, post-loan alerts

WORST CASE STILL ₹12.9 CR

Base ₹16.7 Cr a year

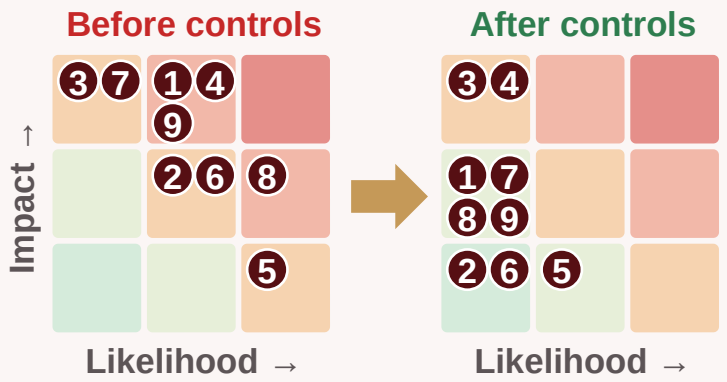

Sources: Team model: 34,200 checks a year; ₹4,000 fee + ₹1,500 staff time today; mix 35/35/30; 2-pt drop-off; 3.5% margin. All estimates.

₹8 Cr build → ₹16.7 Cr a year at full scale, and nothing changes for customers or credit until the pilot proves it

SAFE BY DESIGN: 9 RISKS OWNED, 7 RULES MAPPED

Objective: give every risk a control, an owner and a stop rule, and map every RBI rule to a built control

9 RISKS - BEFORE AND AFTER CONTROLS

No risk stays in a red zone after controls

RISK REGISTER - CONTROL AND OWNER FOR EACH

Risk	How we control it	Owner
1 Wrong house shown	Geofence, random prompts, meter	Tech services
2 AI misreads a deed or plan	Exact-words proof; unsure → a person	Model risk team
3 A fast-lane loan goes bad	LTV ≤ 50%; 1 in 10 fully visited	Chief Risk Officer
4 Regulator questions lanes	Panel valuer signs; Board lane policy	Compliance
5 Land data missing	Gaps send the file to a slower lane	Operations
6 Agencies push back	Per-lane fee plus speed bonus	Head of Mortgages
7 Customer data misused	Aadhaar, PAN, phone masked before AI	Privacy (DPO)
8 **AI provider is offshore**	Masked text now; India host by pilot	CTO + DPO
9 Valuer collusion, conflict	Panel, independence check; 1-in-10 audit	Credit Policy

7 RULES - WHERE FIRST SIGHT MEETS EACH

Rule	What FIRST Sight does	Status
RBI CRM 2025 · para 70.2	Only approved, independent panel valuers sign	Built
RBI CRM 2025 · para 70.3	2 reports at ₹50 Cr+, lower value used (R19)	Built
Ch X + SARFAESI s.23	CERSAI search day 1; filed within 30 days	Built, sim.
Digital Lending Dir. 2025	Consent first; numbers masked; data in Mumbai	Built
Digital Lending · offshore	India-hosted model or 24-hour deletion	At pilot
DPDP Act + Rules 2025	Notice, purpose-bound consent, person review	Built
RBI FREE-AI 2025	Rules decide; AI off switch; disclosed; blind test	Built

WHO RUNS IT - ONE SPONSOR

- **Sponsor: Head of Mortgages** business case and adoption
- **Steering: CRO, CTO, Compliance, Ops** approves every gate
- **Owners: Credit Policy, Model Risk, Tech** plus Audit for 1-in-10 full visits
- **Stop rule:** the fast lane pauses if defaults or value gaps beat the control group

Sources: RBI CRM Directions 2025 (RBI/DOR/2025-26/157) Ch IX-X; SARFAESI s.23; Digital Lending Directions 2025; DPDP Rules 2025; FREE-AI 2025.

9 risks before controls → all lower after, with one sponsor, named owners and a fast lane that pauses itself

APPENDIX A1: THE EVIDENCE BEHIND EVERY NUMBER

Objective: show how each claim was measured, what the 3-year numbers rest on, and what is not proven yet

BLIND TEST - 100 OF 100 CAUGHT, 0 FALSE ALARMS

Checks on	Files	Planted	Caught	False alarms
Property	40 (8 clean)	69 · 11 kinds	**69**	**0**
Reports	24 (IDFC-based)	31 · 6 kinds	**31**	**0**

Run 10 Nov 2026 · plus 36 automated tests

LIVE AI ON IDFC'S 3 REAL REPORTS - UNDER 3 MIN EACH

Run	Time	AI cost	Result
Report 1	42 s	$0.0046	**same findings, 0 missed, 0 extra**
Report 2	160 s	$0.0041	**same findings, 0 missed, 0 extra**
Report 3	55 s	$0.0054	**all 3 sign-off stops found**
V-PIP photo	5.6 s	$0.0001	**flagged a screen photo**

Under ₹1 of AI cost per report, measured 10 Nov 2026

3 THINGS NOT PROVEN YET - THE PILOT TESTS EACH

- **AI on messy Hindi, Tamil scans** → answer-key test pack next
- **Real lane mix, customers kept** → only IDFC's own files show it
- **ULI, CERSAI links simulated** → connected in Build (M3-5)

We name the gaps; the shadow pilot closes them

3-YEAR VIEW - ₹18 CR AHEAD BY YEAR 3

₹ Cr	Year 1	Year 2	Year 3
Money saved	2.26	6.77	9.03
Extra interest earned	1.93	5.78	7.70
Running cost	−2.50	−2.50	−2.50
Net gain	**1.68**	**10.05**	**14.23**
Total so far, after ₹8 Cr build	**−6.32**	**3.73**	**17.96**

Rolled out 25% · 75% · 100%; cash turns positive in year 2

5 ASSUMPTIONS - RANKED BY GAIN SWING

Assumption	Base	Tested	Gain, ₹ Cr/yr	Swing
Customers kept	2 pts	1-3 pts	12.9-20.6	**High**
Checks a year	34,200	25k-45k	14.3-19.6	**High**
Agency fee	₹4,000	₹3k-5k	14.3-19.1	**Med**
Sight 24 share	35%	20-50%	14.8-18.2	**Med**
Interest margin	3.5%	3-4%	15.6-17.8	**Low**

Worst single case still ₹12.9 Cr a year

Sources: FIRST Sight blind test and live AI runs, 10 Nov 2026; app business-case model (rollout 25% · 75% · 100%). Money figures are estimates.

Measured: 100 of 100 caught, 3 reports read in < 3 min → estimated: ₹18 Cr ahead by year 3

APPENDIX A2: THE LIVE PROTOTYPE, STEP BY STEP

Objective: let any judge run a real IDFC case end to end on a phone or laptop, with a guided tour

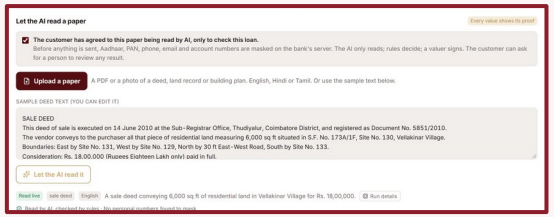

SCAN TO TRY IT

first-sight-fame.vercel.app

Simulated: ULI, CERSAI, panel list

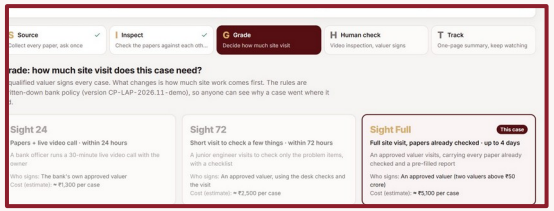

Works on any phone, no login

1 · CONSENT, THEN AI READS

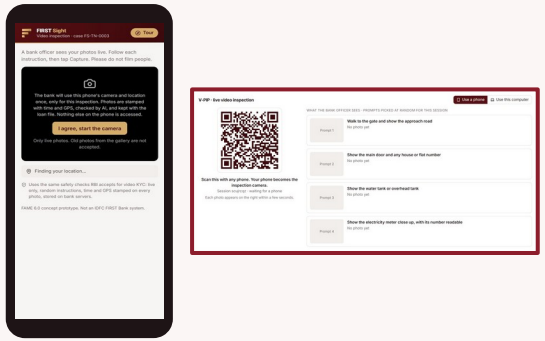

Consent first; numbers masked; every value shows its proof

2 · RULES PICK THE LANE

Report 3 → Sight Full, with the reason and the Sight Score

3 · V-PIP VIDEO CHECK

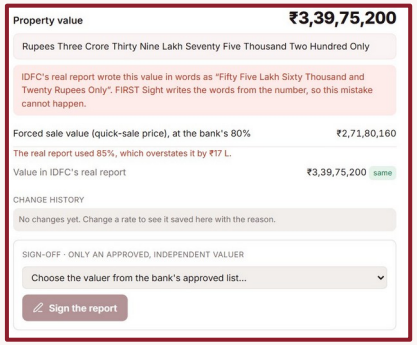

Owner's phone is the camera; officer sees GPS, time, prompts

9 KEY SOURCES
