Try it live

Team NAME

FIRST SIGHT - DIGITAL PROPERTY CHECKS FOR LAP

From a 7-day, ₹5,500 visit for every file to a day-1 check, 3 risk lanes and a panel valuer's signature

IDFC FIRST Bank

THE PROBLEM

7 days | ₹5,500

per check | 3 of 3 IDFC reports hid a mismatch

THE STRATEGY

4 Pillars | 3 Lanes

day-1 check → visit by risk → valuer signs

THE OUTCOME

2.6 days | ₹2,860

₹16.7 Cr a year (est.) | payback ≈ 20 months

THE PROBLEM - FOUR NUMBERS THAT DEMAND ACTION

7 days	9 days	3 of 3	₹7.7 Cr
to clear today	of paperwork	reports wrong	interest lost

The visit takes a day; the paperwork and its errors take the rest

THE BLUEPRINT - 4 PILLARS + 1 SIGNATURE

Day-1 check	3 lanes	Video, valuer	Second Sight
20 checks, day 1	35/35/30 by risk	1-page card	any agency report

Approved panel valuer signs every file → 1-page Collateral Card

Pillars 1 and 4 start in month 1; lanes wait for the pilot

THREE PHASES - FROM SHADOW TO SCALE

PHASE 1 - PROVE	PHASE 2 - GO LIVE	PHASE 3 - SCALE
Months 0-8	*Months 9-12*	*Months 13-24*
1,000-file shadow pilot	Lanes live in 2 cities	All LAP + home loans
Proof built ✓	**Speed proven ✓**	**Payback ≈ M20 ✓**

Each phase proves the next | No phase is skipped

FINANCIAL TRANSFORMATION - TODAY TO FULL SCALE

₹5,500 → ₹2,860	7 → 2.6	100% → 30%	13 → 1
COST / CHECK	DAYS	FULL VISITS	PAGES READ

₹9.0 Cr saved + ₹7.7 Cr interest = ₹16.7 Cr a year (est.)

THREE ADVANTAGES NO COMPETITOR CAN REPLICATE

IDFC's own 3 reports, replayed live	Proof on the bank's own paper
Only tool that sets the visit level	Visit level is bank policy
Live app today, hosted in Mumbai	Pilot-ready, not a concept

Each one is built and working today

SIX MILESTONE GATES - PROOF AT EVERY STAGE

BOARD	BUILT	PROVEN	LIVE	PAYBACK	SCALED
M2	M5	M8	M12	M20	M24
Policy ok	Audit ok	0 misses	Risk flat	Cash ≥ ₹0	All LAP

Miss a gate and the steering committee reviews

Sources: IDFC FAME 6.0 case pack; FIRST Sight tests, 10 Nov 2026; RBI CRM Directions 2025. Money figures are estimates.

4 pillars | 3 lanes | 1 signature: 7 days and ₹5,500 → 2.6 days and ₹2,860 per check, payback ≈ 20 months

PILLAR 1: DAY-1 CHECK - EVERY PAPER CROSS-CHECKED FIRST

Objective: check every LAP file 20 ways on day 1, so errors like Report 3's surface before anyone travels

IDFC FIRST Bank

THE PROBLEM

3 of 3

reports hid a mismatch found only after the visit

WHY THIS APPROACH

1 vs 9 days

the visit takes 1 day; the paperwork takes 9

EXPECTED OUTCOMES

100/100

mistakes caught in 64 blind files · 0 false alarms

OPERATIONAL TIMELINE - 12 MONTHS

20 rules signed ↓ AI ≥ 98% ↓

Rules from IDFC	ULI, CERSAI links	Shadow: 1,000 files	Every new file
M0-2	M3-5	M6-8	M9-12

Month 9: every new LAP file checked on day 1

S.I.G.H.T. ON DAY 1 - 4 STEPS, 20 CHECKS

SOURCE Day 0 — Papers asked once; consent first; ID numbers masked	Papers	Asked once
INSPECT Day 0 — AI reads deed, plan and tax receipt, each value with proof	Per report	< 3 min, < ₹1
CHECK Day 0-1 — 20 rules compare papers, land map, CERSAI, nearby sales	Blind test	100/100 caught
FLAG Day 1 — Each flag names the 2 papers that disagree and the fix	Report 3	Survey gap found

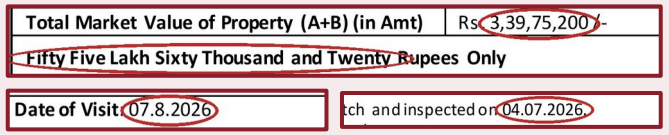

Day 1: every paper read, cross-checked and flagged with its proof

KEY RISKS & MITIGATIONS

- **AI misreads** — Unsure → a person
- **Land data gap** — Gap → slower lane
- **Hindi, Tamil** — Answer-key test
- **Data misuse** — Masked before AI

Every control is built and testable today

IDFC'S REPORT 3 - 3 ERRORS, ALL SIGNED, ALL FOUND ON DAY 1

1. ₹55.6 lakh in words for a ₹3.40 Cr house
2. Quick-sale 85%, not 80%: ₹17 lakh high
3. 2 visit dates: 7 Aug vs 4 Jul

Each error passed the agency's own checks; FIRST Sight flags all 3 on day 1

KPIs & STRATEGIC IMPACT

SUCCESS KPIs

≥ 98% AI accuracy	60%+ auto-filled
0 misses	Day 1 flags found

WHY THIS MATTERS?

3 of 3	*fixed day 1*
₹17 lakh	*over-value*
₹2.84 Cr	*gap caught*

Errors are caught before money moves

Sources: IDFC sample reports 1-3; FIRST Sight blind test and live AI runs, 10 Nov 2026; DoLR DILRMP (Aug 2026).

Problems found weeks after the visit → found on day 1, before anyone travels (100 of 100 in blind tests)

PILLAR 2: THREE LANES - VISIT ONLY WHERE RISK NEEDS IT

Objective: send 70 of 100 files through a 24- or 72-hour lane by 2 written rules, a panel valuer signing each

IDFC FIRST Bank

THE PROBLEM

100%

of files get one full visit, whatever the risk

WHY THIS APPROACH

2 questions

written rules: same file, same lane, every time

EXPECTED OUTCOMES

2.6 days

not 7, at ≈₹2,860 a check, not ₹5,500 (est.)

3 LANES - SET ON DAY 1 BY 2 WRITTEN QUESTIONS

SIGHT 24	≤ 24 h	No flag, LTV ≤ 50%, 4+ sales within 15%: live video	35 of 100 files ≈₹1,300
SIGHT 72	≤ 72 h	Smaller flag or loan ₹1-5 Cr: engineer visits flags only	35 of 100 files ≈₹2,500
SIGHT FULL	≤ 4 days	Serious flag, loan > ₹5 Cr, ₹50 Cr+ (2 reports, RBI 70.3)	30 of 100 files ≈₹5,100
SAFETY NET	Always	1 in 10 fast files fully visited; gaps never speed a file	Audit 10% of fast

70 of 100 files clear in 72 h or less; a panel valuer still signs every file

WHY CHECK-FIRST WORKS - 4 MARKETS ALREADY DO IT

US 16-17%	**AU 12% → 21%**	**UK 3 steps**	**IN 1 ID**
skipped appraisal	desktop, kerbside	AVM → desk → visit	one property ID

We borrow what works abroad and plug in India's best ideas

OPERATIONAL TIMELINE - 12 MONTHS

Board approves ↓ 0 misses ↓

Board lane policy	Rules engine	Lanes in shadow	Sight 24, 72 live
M0-2	M3-5	M6-8	M9-12

Month 12: 70 of 100 files clear in 72 h or less

KEY RISKS & MITIGATIONS

Fast loan fails — LTV ≤ 50%; audits	**Regulator query** — Panel valuer signs
Wrong lane — Rules versioned	**Agency pushback** — Per-lane fee, bonus

Speed never outruns the safety net

KPIs & STRATEGIC IMPACT

SUCCESS KPIs

70% fast lanes	**2.6** days, avg
< 20% overrides	**0 rise** in defaults

WHY THIS MATTERS?

₹9.0 Cr	*saved a year*
4.4 days	*per file*
30%	*full visits*

Faster for 70 files, no weaker for any

Sources: Fannie Mae value acceptance; Cotality (CoreLogic) Australia; Hometrack UK; RBI CRM Directions 2025 paras 70-73.

Every file visited the same way → 3 lanes by risk: 7 days and ₹5,500 → 2.6 days and ₹2,860 (est.)

PILLAR 3: VIDEO + VALUER - PHONE VISITS, VALUER SIGNS

Objective: a safe video visit on the owner's phone, and an error-proof report for the valuer

IDFC FIRST Bank

THE PROBLEM

2 errors

in Report 3: value in words, 85% quick-sale

WHY THIS APPROACH

Live video

borrows RBI V-CIP controls: live and stamped

EXPECTED OUTCOMES

1 page

for credit instead of 13, signed by a panel valuer

4 PARTS - FROM THE OWNER'S PHONE TO A SIGNED CARD

V-PIP VIDEO	30 min	Officer's QR opens the call; live photos, random prompts	Meter read: 5.6 s
FRAUD GUARDS	Live	GPS and time stamps; geofence; screen photos flagged	Fake photo: Flagged
VALUER CO-PILOT	< 1 day	Form pre-filled; approved panel valuer sets rates, signs	Sign-off: < 1 day
COLLATERAL CARD	Day 2-3	1 page for credit; every number links to its source	Credit reads: 1 page, not 13

The phone replaces travel, not judgement: the valuer decides every rate

WHY VIDEO - AND NOT THE ALTERNATIVES

- ~~**Full visit, every file**~~ — ≤ 4 days · ≈₹5,100
- ~~**Desk check only**~~ — no site proof for LAP
- **Live owner video** — 30 min · ≈₹1,300

Video keeps site proof at about a quarter of the cost

OPERATIONAL TIMELINE - 12 MONTHS

Panel list → Video = visit

Panel + video rules	V-PIP, Co-Pilot	Beside full visits	Video in Sight 24
M0-2	M3-5	M6-8	M9-12

Month 12: Sight 24 cleared by video within 24 h

KEY RISKS & MITIGATIONS

- **Wrong house** — Geofence, prompts
- **Valuer conflict** — Independence check
- **Offshore AI** — Masked; India host
- **Valuers resist** — Valuer sets rates

A person signs; AI never decides

KPIs & STRATEGIC IMPACT

SUCCESS KPIs

- **60%+** fields kept
- **< 1 day** sign-off
- **30 min** video visit
- **0** unapproved

WHY THIS MATTERS?

- **₹17 lakh** *value fixed*
- **₹1,300** *per check*
- **1 page** *for credit*

Typing errors cannot reach credit

Sources: RBI KYC Master Direction (V-CIP controls); FIRST Sight prototype tests, 10 Nov 2026; IDFC sample Report 3.

A 13-page typed report → a 1-page card signed by an approved panel valuer, with typing errors blocked

PILLAR 4: SECOND SIGHT - CHECK EVERY AGENCY REPORT FROM DAY 1

Objective: check every agency report IDFC already gets, with no bank system, while lanes are piloted

IDFC FIRST Bank

THE PROBLEM

80% vs 85%

two agencies, two quick-sale rules for one bank

WHY THIS APPROACH

No IT link

upload any report PDF; it works from day 1

EXPECTED OUTCOMES

3 stops

on Report 3, 1 serious, before credit saw it

4 CHECKS ON EVERY AGENCY REPORT - FROM DAY 1

NUMBER VS WORDS	Instant	Value in words must match the figure	Report 3: ₹2.84 Cr gap
BANK RULES	Instant	Quick-sale %, LTV, govt rate applied the bank's way	Report 3: ₹17 lakh
PAPERS VS REPORT	Day 1	Survey numbers, area, dates checked against papers	Report 3: 1 serious
FRAUD SIGNALS	Day 1	Same house on another loan (R20), resale, seller's valuer	Case 6: Stopped

Works on any PDF today: no bank system, no integration, no wait

REPORT 3 - BEFORE AND AFTER SECOND SIGHT

IDFC report

Total Market Value of Property (A+B) (in Amt)	Rs. 3,39,75,200/-
Fifty Five Lakh Sixty Thousand and Twenty Rupees Only	
Forced Sale Value (85%)	Rs. 2,88,78,920/-

Words	₹55.6 lakh	₹3.40 Cr
Sale %	85%	80%

Both errors stopped at sign-off, before credit saw them

OPERATIONAL TIMELINE - 12 MONTHS

Live day 1 → Report card →

Upload any report	All agencies	Agency report card	Feeds lane rules
M1	M2-3	M4-6	M7-12

Month 1: every agency report checked before credit

KEY RISKS & MITIGATIONS

- **Agency disputes** — Flag shows 2 papers
- **False alarms** — 0 in 24 tests
- **Poor scans** — Unsure → a person
- **Data leaves IDFC** — Mumbai; masked

Flags are evidence, not verdicts

KPIs & STRATEGIC IMPACT

SUCCESS KPIs

- 100% checked
- 0 wrong stops
- Day 1 go-live
- 31/31 caught

WHY THIS MATTERS?

- **Day 1** *no IT needed*
- **₹17 lakh** *found, Rpt 3*
- **1 view** *agency card*

The day-1 wedge that earns trust for the lanes

Sources: IDFC sample Report 3; FIRST Sight Second Sight run and fraud test (Case 6), 10 Nov 2026.

Agency reports trusted as typed → every report checked on day 1, with no bank system needed

COMBINED SUMMARY - THE 4 PILLARS ADD UP

Objective: 4 pillars that feed each other, so ₹8 Cr of build returns ₹16.7 Cr a year and pays back by month 20

IDFC FIRST Bank

FINANCIAL RESULT

₹16.7 Cr

a year: ₹9.0 Cr saved + ₹7.7 Cr interest (est.)

HOW IT WORKS

4 Pillars

each feeds the next, starting on day 1

WHAT IT UNLOCKS

Home loans

the same system, about twice the cases

HOW THE FOUR PILLARS FEED EACH OTHER

Day-1 check flags, day 1 → **3 lanes** 70% fast → **Video, valuer** 1-page card → **Second Sight** day-1 value

Checks feed lanes, lanes cut visits, the valuer signs; Second Sight starts it

WHAT EACH PILLAR DELIVERS

Pillar	Action	Financial impact	Strategic impact
P1 Day-1 check	20 checks, day 1	**Stops ₹17 lakh errors**	Flags before travel
P2 Three lanes	35/35/30 by 2 rules	**₹9.0 Cr saved a year**	2.6 days, not 7
P3 Video + valuer	V-PIP, Co-Pilot	**₹1,300 vs ₹5,500**	1 page for credit
P4 Second Sight	Every agency report	**No IT cost to start**	Value from day 1
All 4 together	**Day 1 → signed**	**₹16.7 Cr a year**	**Payback ≈ M20**

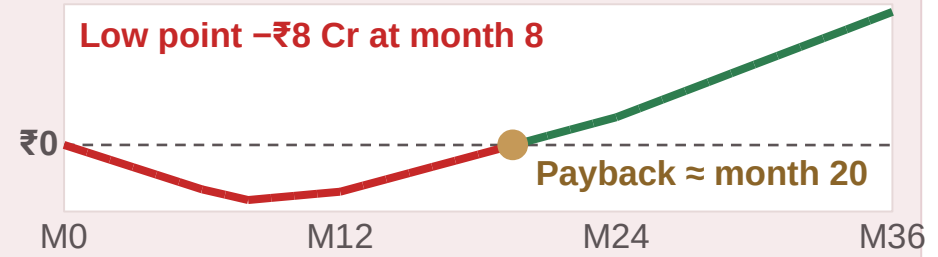

Every pillar ends in money, time or proof

COMBINED IMPACT - TODAY VS FULL SCALE

Metric	Today	FIRST Sight	Impact
Cost per check	₹5,500	₹2,860	−48%
Days to clear	7	2.6	−4.4 days
Full site visits	100 of 100	30 of 100	−70%
Credit reads	13 pages	1 page	−12 pages
Errors found	after visit	day 1	pre-visit
Yearly gain	-	₹16.7 Cr	+₹16.7 Cr

Every metric moves the right way at once

CASH POSITIVE AT M20, +₹18 CR BY M36

Build ₹8 Cr: team 4.5 · links 1.5 · AI, cloud 1.0 · training 1.0

Run: ₹2.5 Cr a year, already in the numbers

Not counted: fraud avoided, home-loan reuse, post-loan alerts

Sources: Team model: 34,200 checks a year; ₹4,000 fee + ₹1,500 staff time; mix 35/35/30; 2-pt drop-off; 3.5% margin. All estimates.

₹8 Cr build → ₹16.7 Cr a year at full scale (est.), and nothing changes for credit until the pilot proves it

MASTER ROADMAP AND GOVERNANCE - 24 MONTHS

Objective: 4 streams, gated phases, every RBI rule mapped and every risk owned, with a stop rule from day 1

IDFC FIRST Bank

24-MONTH ROADMAP - 4 STREAMS RUN CONCURRENTLY

	PROVE (M0-8)	GO LIVE (M9-12)	SCALE (M13-24)
DAY-1 CHECK	Rules + AI built	All new LAP files	Home loans added
THREE LANES	Shadow, 1,000 files	Sight 24, 72 live	All branches
VIDEO + VALUER	Panel + V-PIP built	Video in Sight 24	Co-Pilot for all
SECOND SIGHT	Live from month 1	Agency report card	Feeds lane rules

All 4 streams start in month 1; each lane goes live only after its gate

7 RULES - WHERE FIRST SIGHT MEETS EACH

Rule	What FIRST Sight does	Status
RBI CRM 2025 · para 70.2	Only approved, independent valuers sign	Built
RBI CRM 2025 · para 70.3	2 reports at ₹50 Cr+, lower value used	Built
Ch X + SARFAESI s.23	CERSAI search day 1; filed in 30 days	Built, sim.
Digital Lending 2025	Consent; numbers masked; data in Mumbai	Built
Digital Lending · offshore	India-hosted model or 24-hour deletion	At pilot
DPDP Act + Rules 2025	Notice, purpose-bound consent, review	Built
RBI FREE-AI 2025	Off switch, disclosure, blind test	Built

6 of 7 built in the prototype; offshore AI is closed at pilot

RISK REGISTER - 9 RISKS, BEFORE → AFTER

Wrong house shown *Geofence, random prompts · Tech services*	High	Low
AI misreads a deed *Unsure → a person checks · Model risk*	Med	Low
Fast-lane loan goes bad *LTV ≤ 50%; 1-in-10 audit · CRO*	Med	Med
Regulator questions lanes *Panel valuer; Board policy · Compliance*	Med	Low
Land data missing *Gaps go to a slower lane · Operations*	Low	Low
Agencies push back *Per-lane fee + bonus · Head of Mortgages*	Med	Low
Customer data misused *Aadhaar, PAN, phone masked · DPO*	Med	Low
AI provider is offshore *Masked now; India host at pilot · CTO*	High	Low
Valuer collusion, conflict *Independence check; audit · Credit Policy*	High	Low

No risk stays High after its control

WHO OWNS IT - ONE SPONSOR

Sponsor: Head of Mortgages. Steering: CRO, CTO, Compliance, Ops

Stop rule: the fast lane pauses if defaults beat the control group

Sources: RBI CRM Directions 2025 (RBI/DOR/2025-26/157) Ch IX-X; SARFAESI s.23; Digital Lending Directions 2025; DPDP Rules 2025; FREE-AI 2025.

4 streams, 9 risks owned, 7 rules mapped: a plan specific enough to run and safe enough to approve

APPENDIX

APPENDIX A - BENCHMARKS & EVIDENCE BASE

Every material number rests on a third-party source or a measured test, and we name what is still an estimate

IDFC FIRST Bank

MARKET & INDUSTRY BENCHMARKS

Source	Fact	So what
Fannie Mae · 2025	16-17% skipped full appraisal	*Check-first is safe*
Cotality AU · 2025	Desktop share 12% → 21%	*Desk checks growing*
Hometrack UK	AVM → desktop → visit	*Our 3 lanes mirror it*
IDFC Q2 FY27	LAP = 11% of ₹3,46,913 Cr	*LAP matters to IDFC*
IDFC Q2 FY27	Mortgages +8.7% vs 35.4%	*Speed is the lever*
DILRMP · 2026	99.9% land records online	*Desk checks possible*

Abroad it is proven; in India the data now exists

PROOF ON IDFC'S OWN REPORTS - MEASURED 10 NOV 2026

Test	Set-up	Result
Property test	40 files, 69 hidden, 11 kinds	**69/69, 0 false alarms**
Report test	24 files, 31 hidden, 6 kinds	**31/31, 0 wrong stops**
Live AI, 3 reports	42-160 s, < $0.006 each	**= manual reading**
V-PIP photo	5.6 s, $0.0001	**screen photo flagged**

Plus 36 automated tests; all 3 report values matched to the rupee

KEY ASSUMPTIONS REGISTER

Assumption	Value	Basis	Pillar	Swing
Checks a year	34,200	₹11,000 Cr ÷ ₹45 L × 1.4	P2	High
Customers kept	2 pts	estimate; pilot tests it	P1-3	High
Agency fee	₹4,000	published ₹4.5-5k	P2	Med
Lane mix	35/35/30	US, AU desktop shares	P2	Med
Staff time	₹1,500	credit + technical review	P2	Low
Interest margin	3.5%	below IDFC's margin	All	Low
Build cost	₹8 Cr	team, links, AI, training	All	Med
Running cost	₹2.5 Cr/yr	cloud, AI, support	All	Low
Rollout	25-100%	3-year ramp	All	Med

High-sensitivity inputs are exactly what the pilot measures

NOT PROVEN YET - THE PILOT TESTS EACH

- **AI on messy Hindi, Tamil scans** → answer-key pack
- **Real lane mix, customers kept** → IDFC files only
- **ULI, CERSAI links simulated** → built M3-5

We name the gaps; the shadow pilot closes them

Every material assumption has a source or a test: this plan is grounded in evidence, not optimism

APPENDIX B - FINANCIALS AND UNIT ECONOMICS

The 3-year cash view, the cost and time of each lane, where the ₹8 Cr goes, and how far the gain can move

IDFC FIRST Bank

FIRST THREE YEARS (₹ CR) - ROLLED OUT 25% · 75% · 100%

₹ Cr	Year 1	Year 2	Year 3
Money saved	2.26	6.77	9.03
Extra interest earned	1.93	5.78	7.70
Running cost	−2.50	−2.50	−2.50
Net gain	**1.68**	**10.05**	**14.23**
Total so far, after ₹8 Cr build	**−6.32**	**3.73**	**17.96**

Cash turns positive in year 2

UNIT ECONOMICS - COST AND TIME PER LANE

Lane	Share	Cost / check	Time	Signs
Sight 24	35%	≈₹1,300	≤ 24 h	panel
Sight 72	35%	≈₹2,500	≤ 72 h	panel
Sight Full	30%	≈₹5,100	≤ 4 days	panel ×2*
Weighted	**100%**	**≈₹2,860**	**2.6 days**	**-**
Today	100%	≈₹5,500	7 days	panel

**2 reports at ₹50 Cr+ (RBI 70.3); weighted cost 48% lower*

₹8 CR BUILD - WHERE IT GOES

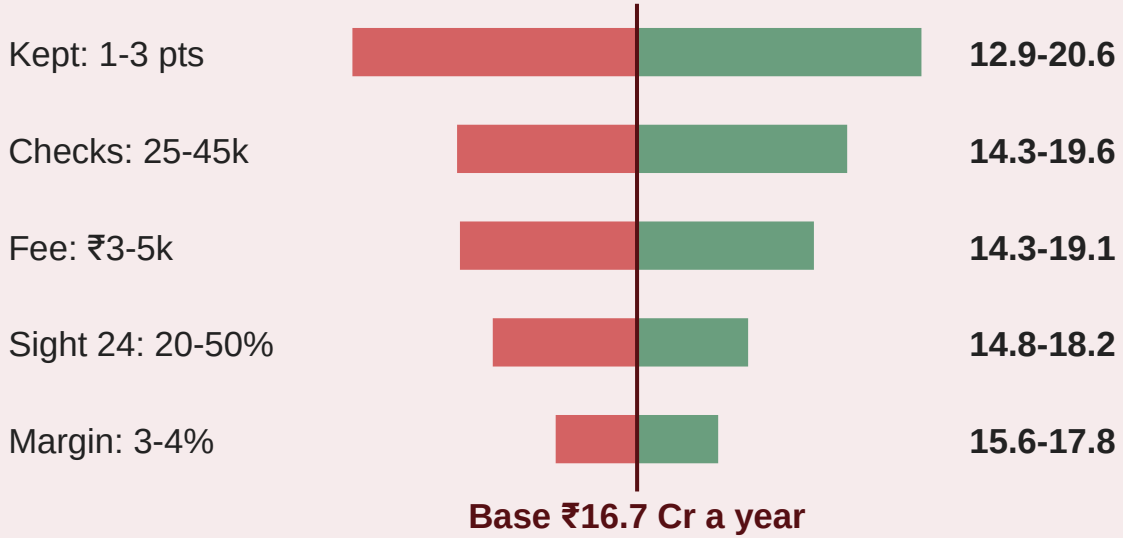

- Product and tech team: ₹4.5 Cr
- ULI, CERSAI, LOS links: ₹1.5 Cr
- AI, cloud, security: ₹1.0 Cr
- Training, change: ₹1.0 Cr

Run: ₹2.5 Cr a year (cloud, AI, support), in every year above

Not counted: fraud avoided, home-loan reuse, post-loan alerts

Over half the build is people; no new branches or hardware

STRESS TEST - WORST CASE STILL ₹12.9 CR A YEAR

₹8 Cr build → ₹17.96 Cr ahead by year 3 (est.); worst single case still ₹12.9 Cr a year
